2.5 Evaluation Process and Reforms

2.5.1 Mechanism of internal assessment is transparent and robust in terms of frequency and mode

Response:

- Internal evaluation at the institute is open, flexible, and reliable.
- The college, which is associated with Jawaharlal Nehru Technological University in Kakinada, Andhra Pradesh, follows the University's academic calendar, examination, and assessment procedures for all programmes.
- JNTUK makes the program's course structure available on its website, <http://www.jntuk.edu.in> and also at <http://www.pci.nic.in>. At the start of each new academic year, the institute hosts an Orientation Program for newly admitted students and their parents, during which the Principal acts as a chief superintendent for conducting smooth running of exams and the College Examination incharge provide detailed instructions on the examination scheme, OMR sheet marking, evaluation system, and passing criteria to the new students and their parents.
- JNTUK publishes an academic calendar before the start of each academic year, which is then posted on the University's website. JNTUK provides the start of the academic year and end of semester dates for B. Pharmacy, M. Pharmacy, and Pharm. D students in the academic calendar. Academic calendars are posted on notice boards.
- This year, first-year students in the B.Pharmacy, Pharm.D., and M.Pharmacy programs follow the evaluation procedure by using BET-PRO since the institute is currently autonomous.
- The autonomous papers of internal examinations are evaluated using BET-Pro. This method ensures a consistent and high-standard evaluation process for all students.
- The institute has established an Examination Committee to oversee all examination-related activities at the institute level. The institute has appointed one of the experienced teachers as College Examination incharge in accordance with University regulations. He sends out notices to staff and students about any exam-related matters, which he posts on the college notice board.
- The concerned senior faculty in the department must only place the question paper for the midterm exams in the exam section. The question paper is delivered to the examination section earlier than scheduled.
- In terms of seating design, a strong system is in place. An invigilator is assigned to every 24 students for the examination.
- Students are informed of the guidelines prior to the start of the exam.
- For the internal evaluation of theory and practical subjects, the institute follows JNTUK norms.
- Lab examinations for B. Pharm, M. Pharm, and Pharm. D, are graded on a weekly basis based on continuous internal assessment, which includes day-to-day performance, observation, and record work submission.
- Exam section members upload marks received by students in the mid-term examination to JNTUK via an internet portal.
- The answer scripts of mid exams and weekend exams are saved and documented for future reference and explanation.

Continuous assessment in theory subjects:

Two internal midterm exams will be held in accordance with JNTUK norms. As per PCI B.Pharmacy syllabus, 2 mid terms and 2 lab internals are conducted.

- All of the mentioned activities will be graded, and the average will be used to determine the assignment grade.
- Internal tests are for 15 points, Continuous Mode is worth 10 points, and external exams are worth 75 points. The college conducts the following components as part of internal exams under this framework.
- To ensure consistency in the review of scripts by new recruits, the scripts are randomly scrutinised by seniors, who are alerted to any irregularities.
- Slow learners should take special tests.
- More practise assignments are supplied.
- Each student in the class is encouraged to give a seminar.

Continuous assessment in practical subjects:

- There will be a continuous evaluation for practical subjects throughout the semester for 15 sessional marks and 35 end examination marks. To improve the outcome of laboratory work completed in a semester, 5 points will be awarded for day-to-day work in the laboratory, and 10 points will be awarded for an internal examination for practical conducted by the concerned laboratory teacher.
- In this regard, the faculty will evaluate the student's daily performance for each experiment, including regularity, process, results, viva, and promptness in submitting records, and the marks earned will be noted against each experiment in the student's record.
