

2.6 Student Performance and Learning Outcomes

2.6.1 Programme and course outcomes for all Programmes offered by the institution are stated and displayed on website and communicated to teachers and students.

Response:

The Institute's Program Outcomes (PO) and Course Outcomes (CO) determine the value of academic learning for all of the Institute's Programs and Courses (CO). In addition to the institute's Vision, Mission, and Quality Policy, the institute has designed its POs and COs with an idealistic perspective to correspond to the goals of each programme.

- Course outcomes are direct statements that indicate the fundamental knowledge that students should receive and the level of learning that is expected at the end of the course. JNTUK, Kakinada has established a variety of programmes to meet the needs of students' job possibilities.
- The fundamental goal of Programme and Course Outcomes is to teach knowledge and improve skills that are necessary for students capability and personality development. Students' general growth is also emphasised through the instillation of values and ethics, as well as the improvement of interpersonal and communication skills through learning outcomes.
- Following consultations with subject specialists, POs, and COs, are developed for all UG and PG programmes. To create them, the entire faculty had group discussions.
- At the start of the academic year, lesson plans are created including Course Objectives, Course Outcomes, teaching resources, and the total amount of teaching hours. All course COs must first be presented to the IDC (Institutional Development Cell) for approval before being posted on the notice boards. Every IQAC meeting discusses the necessity of POs and COs.

The college's vision, mission, values, and goals are posted at the entrance to help students understand the college's perspective.

- All of the institute's programmes' Vision, Mission, Program Outcomes (POs), and Course Outcomes (COs) are expressed and uploaded on the College Website (www.adityapharmacy.edu.in) and conveyed to all teachers and students.
- The Program Outcomes and Course Outcomes are explained to newly hired employees. After the courses have been assigned, the POs and COs are described to them.
- Every faculty member tells students about the course structure and their accompanying outcomes at the start of each semester. The library, laboratories, and departments all have copies of the syllabus. Students, staff members, and all other stakeholders have access to them.
- During the Orientation Program at the start of the academic year, students and parents are informed about them.
- The evaluation of students is done in the background of these to make the teaching-learning process effective, and it allows the faculty to focus on the attainment of these.
