Event Report

Date: 28-11-2016

Title : Pharmaceutical Industry: Indian Prospective
Speaker : Ramalingeswar Rao Y
Designation : GM Operations AR & D, Novartis health care limited,
Hyderabad.
Qualification : M.Pharm, PhD
Date of Seminar : 26th November 2016
Class of participants : B-Pharm, M -Pharm, Pharm-D
Venue : Seminar Hall, Aditya College of Pharmacy.

Total number of participants: 185

Description about the event:

Ramalingeswar Rao Y addressed the students of pharmacy that Indian pharmaceutical sector accounts for about 2.4 per cent of the global pharmaceutical industry in value terms and 10 per cent in volume terms and is expected to expand at a Compound Annual Growth Rate (CAGR) of 15.92 per cent to US\$ 55 billion by 2020 from US\$ 20 billion in 2015. With 71 per cent market share, generic drugs form the largest segment of the Indian pharmaceutical sector. By 2016, India is expected to be the third-largest global generic Active Pharmaceutical Ingredient (API) merchant market. The country accounts for the second largest number of Abbreviated New Drug Applications (ANDAs) and is the world's leader in Drug Master Files (DMFs) applications with the US. Indian drugs are exported to more than 200 countries in the world, with the US as the key market. Generic drugs account for 20 per cent of global exports in terms of volume, making the country the largest provider of generic medicines globally and expected to expand even further in coming years. The Government of India plans to set up a US\$ 640 million venture capital fund to boost drug discovery and strengthen pharmaceutical infrastructure. The 'Pharma Vision 2020' by the government's Department of Pharmaceuticals aims to make India a major hub for end-to-end drug discovery.

Event Report

Date: 28-11-2016

Title : Synthesis and Separation of Optically Pure Drugs and their Impurity Profiles
Speaker : A.Raghurama Rao
Designation : Professor, Kakatiya University, Warangal.
Qualification : M.Pharm, PhD, Post-doc
Date of Seminar : 26th November 2016
Class of participants: B-Pharm, M -Pharm, Pharm-D
Venue : Seminar Hall, Aditya College of Pharmacy.

Total number of participants: 172

Description about the event:

A.Raghurama Rao addressed the students of pharmacy about the general scheme is set for the estimation of the impurity of bulk drug substances by the rational use of chromatographic, spectroscopic and analytical techniques. The various parameters to be fulfilled in an impurity profile of drug substances are discussed. Impurity is defined as any substance coexisting with the original drug, such as starting material or intermediates or that is formed, due to any side reactions. The presence of these unwanted chemicals, even in small amount, may influence the efficacy and safety of the pharmaceutical products. Impurity profiling (i.e., the identity as well as the quantity of impurity in the pharmaceuticals), is now gaining critical attention from regulatory authorities. The different Pharmacopoeias, such as the British Pharmacopoeia (BP), United States Pharmacopeia (USP), and Indian Pharmacopoeia (IP) are slowly incorporating limits to allowable levels of impurities present in the APIs or formulations. The International Conference on Harmonization of Technical Requirements for Registration of Pharmaceuticals for Human Use (ICH) has also published guidelines for validation of methods for analyzing impurities in new drug substances, products, residual solvents and microbiological impurities.
