B. PHARMACY PROGRAMME SPECIFIC OUTCOMES(PSOs)

PSO 1: Recognize the pharmacological and toxicological effects of synthetic and plant-based compounds in the detection, avoidance, and treatment of different disorders. Using knowledge of medicinal chemistry, Industrial pharmacy, analytical abilities, and pharmaceutical engineering to develop new dosage forms and drug delivery techniques to meet industrial demands.

PSO 2: To emphasize the importance of quality assurance and control in the development of medication design and formulation. Apply the knowledge in drug laws for entrepreneurship development and marketing pertaining to drug distribution of all scheduled drugs and cosmetics.
