### **6.5.1: Internal Quality Assurance Cell (IQAC) has contributed significantly for institutionalizing the quality assurance strategies and processes**

On July 4, 2018, Aditya College of Pharmacy launched its Internal Quality Assurance Cell (IQAC) with the goal of streamlining the institution's quality initiatives. According to the National Action Plan of the National Assessment and Accreditation Council (NAAC), Bangalore, for performance evaluation, assessment, accreditation, and quality up gradation of higher education institutions, the institution's IQAC is active and is set up in accordance with NAAC's rules. Since then, IQAC has been a crucial component of the institution working to improve quality and advance growth in a variety of aspects. Most departments are represented, and there is a mix of senior and junior instructors.

The quality assurance techniques and procedures were established at Aditya College of Pharmacy with the aid of a very active and effective ISO 9001:2015 Quality Management System (QMS).

To enhance the quality of instruction, IQAC takes the appropriate steps to encourage faculty members to enrol in certification programmes offered by companies like Swayam and Coursera.

As another another recommendation in order to enhance student learning and help them understand concepts more readily, IQAC established the culture of putting projectors in every classroom. The two best practises currently institutionalised by IQAC are:

#### **Promoting research- Scopus journals, article publishing, plagiarism and malpractices**

The IQAC ran a programme to raise awareness of the importance of selecting the top Scopus journals when publishing publications to promote the research and publications by preventing of misconduct including plagiarism in R&D.

Additionally, IQAC established a favorable incentive program for academic staff who publish research papers in journals with high impact factors as well as journals that are indexed by Scopus, Web of Science, and SCI to promote research and inspire people to work toward an organization's vision and mission.

#### **Conduction of faculty development programs/seminars/orientation programs**

The primary goal of Aditya College of Pharmacy is to provide staff and students with enormous information. In order to equip students with the knowledge they would need to live in the outside world once their course is over, a number of seminars were held for them. They will benefit from this information during placements. Programs for orientation were held to provide a foundational understanding of new concepts. To make faculty members' understanding of pharmaceuticals up to date with emerging trends and research techniques, IQAC offers training programmes. By way of refresher courses and faculty training programmes, the institution's faculty is also kept up to date and revitalized with regard to new concepts in the field of pharmacy. The improvement of the faculty's teaching abilities would potentiate students' capacity for learning.

When choosing resource people from prestigious institutions, ACOP always gives its best.
