1.3.1. Institution integrates crosscutting issues relevant to Professional Ethics, Gender, Human Values and Environment and Sustainability into the Curriculum.

The institute has implemented a professional ethics and human values course in an attempt to encourage professional ethics among pharmacy students. The Aditya College of Pharmacy's constitution, pharmacy specialist knowledge, civic responsibilities, fundamental rights, pharmaceutical associations' functions and professional services, and heartfulness meditation are all topics covered in this course. The institute's program curriculum and extracurricular activities foster human values, professional ethics, environmental protection, social equality, and responsibility in addition to teaching professional concepts.

Professional ethics and human values: To assist students in improving their human values and decision-making abilities, a course titled "professional ethics and human values" has been introduced to the program curriculum. Promoting ethical ideas on the foundations of therapeutic actions is the aim of this course. Students frequently visit the GSL Hospital in Rajahmundry, where they counsel patients, deal with prescriptions, and engage with patients. Our college students conduct health-related community service, plan health camps with assistance from Management, UBA, and the NSS unit, and participate in those camps. Through medical camps and health awareness campaigns, students impart their expertise to the public, counsel patients on health issues, and ultimately contribute to a greater appreciation of the need of maintaining good health. Personality development specialists, social activists, and philanthropists motivate and have an impact on students to help them become socially aware citizens.

Gender equality: The Institute maintains an equal representation of men and women in both teaching and non-teaching positions because it values gender equality. The average ratio of female to male students, as determined by entrance analysis, is 60:40. The institute maintains a working women's cell in addition to separate dorms for boys and girls. Workshops and guest lectures are held at the institution on focusing on agendas of gender equality, sexual harassment of women at work, and women's empowerment.

Environment and sustainability: The curriculum for the programme includes a subject called "Environmental Sciences." Teaching staff educate the students on the fundamentals of the environment and how it is applied in numerous fields, and environmental issues are thoroughly discussed in the classroom. The Institute frequently sponsors extracurricular activities that educate students about Swachh Bharath Abhiyan, talking about the risks of plastic use, importance of planting trees, rainwater harvesting, clean and green programmes, the significance of contributing to environmental maintenance, as well as the obligations of personal hygiene.

Aditya College of Pharmacy

The institute's NSS cell coordinates a variety of extracurricular and co-curricular programmes on sustainability and the environment. In light of the pollution and depletion of energy resources, the institute uses a green synthesis system in its pharmaceutical chemistry labs in addition to having a solar power system and other amenities. For the herb and aromatic departments' effective research, the institute's herbal garden has rare, endangered, vulnerable, and endemic plants from various agro-climatic zones in India. The O₂/CO₂ balance of the institute is something that the institute's students frequently finish a project on, and they found that because there is a lot of vegetative propagation, the O₂ content is higher than the CO₂ content. These audits show that the institute has been upholding sustainability and the environment on campus. The institute also conducts energy audits, environmental audits, and green audits.
