# *Principal & Hod Message*

The significant problems we face cannot be solved at the same level of thinking we were at when we created them." - Albert Einstein. It is only through knowledge that man attains immortality. Knowledge has to expand or grow to remain knowledge. The road to excellence is toughest, roughest and steepest in the Universe. The world requires and honors only excellence. Available information has to be directed by wisdom and intelligence to create new knowledge. Promotion of creativity is the new role of education. It is only through creative thinking that the present and future problems can be addressed to find dynamic solutions. Technology should be used to help remove poverty from the world. In fact 40% of the world's poor are in India. Confidence leads to capacity. It is faith in oneself that produces miracles. Education at ACET helps build Character, Strengthen the mind, expand the intellect and establish a culture of looking at problems in a new perspective. The student is put through rigorous training so that he can stand on his own feet after leaving the portals of the Institute.

## *HoD Message*

The scope of computer science is endless. The students of the computer science and engineering are highly demanded by the recruiters of the top companies. Through innovative teaching-learning process a teamwork approach and leadership building experience, our students gain vital communication and critical-thinking skills. Our institution provides a platform for the students to enhance their employability skills through Industry Institute Collaboration.

# Blockchain Technology

*A few years ago, the term "blockchain" was not widely used. We hear a lot about it these days, as well as its application in the financial sector. In some cases, the terms blockchain and cryptocurrency have been used interchangeably. Blockchain and Bitcoin, for example.*

*Is there a place for blockchain in other industries, such as education? Yes, it is correct. Blockchain can be used in a variety of industries, including healthcare, land documentation, and education, because to its decentralised and secure nature. The benefit of utilising blockchain in education is the data security it provides, as it can secure data even if one or more nodes are corrupted.*

**What is Blockchain Technology?**

Blockchain is a distributed, decentralized ledger technology which stores data globally.

The infographic features a central circular graphic with the text "BLOCKCHAIN TECHNOLOGY" surrounded by a network of nodes, each represented by a blue cube with a white padlock icon, symbolizing security and decentralization.
