Foreign languages provide a competitive edge in career choices whereas Hindi is the most commonly spoken language in India, which established its place as one of the most important languages of South-East asia.

Outcome: The Language Club committee conducted a STTP for the 2nd year Engineering students who registered for the programme. The students were divided into 2 batches based on the language they selected. One batch for French and other batch for Hindi.

The basic conversation skills in the corresponding language were developed with this training program. This training helped them to develop skills for their career. A Second language is added to their belt. Learning different languages expands their professional reach.
