ABOUT STTP

Foreign languages provide a competitive edge in career choices: one is able to communicate in a second language. Foreign language study enhances listening skills and memory. Foreign languages expand one's world view and limit the barriers between people: barriers cause distrust and fear.

Hindi is the most commonly spoken language in India, which solidifies its place as one of the most important languages of south-east Asia.

Hindi is spoken by around 260 million people across the globe as a native tongue, with another estimated 120 million people use Hindi as a second language in countries such as India and Nepal.

Due to its vast number of speakers, Hindi is considered to be the fourth most-spoken language in the world, behind languages such as: Chinese, Spanish and English.
